

*If you need fast, accurate and simple data entry and powerful reports with strong statistical data, your best choice is the SportCode BasketStats.*

BasketStats supports the new method of entering basketball game data in real time. Only two clicks of mouse are necessary for each action on the court and all the rest is done by BasketStats for you, enabling you to focus on the game.

For easy reference, BasketStats shows:

- list of 10 latest actions,
- presentation of data you are currently entering and
- score-board showing the score,time of attack and periods of play,as well as which team is attacking.

BasketStats offers powerful reports:

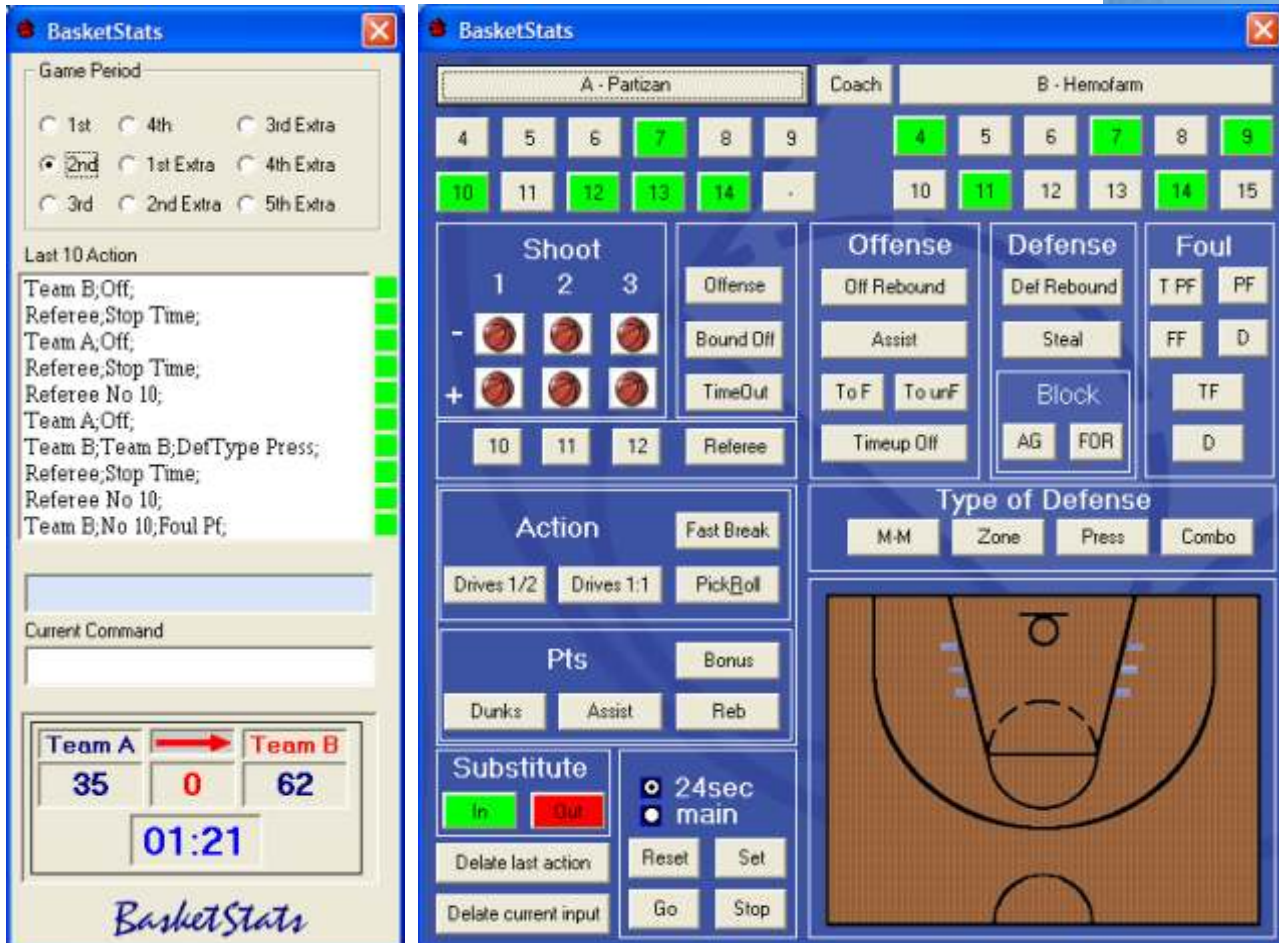

- analyze teams in one game
- analyze teams from more played games
- analyze players in one game
- analyze players from different games
- have Top10 teams under each of 17 most important parameters i.e. 17 lists
- have Top10 players under each of 17 most important parameters
- have Referees' statistics

78 items of data

# BasketStats - the professional tool for basketball game statistics

## BasketStats offers you additional options:

- Language selection for reports and work with BasketStats,
- Instead of manual entering team data, you can use automatic option from data base created by you or Basketball Association of your country. BasketStats offer you the option to create and modify such a data base which containing names of team, coach, players and player's number.
- If you discontinue doing game statistics at any moment, after reopening the program, you will be at the place where you stopped your work.
- Export of report data given in various formats like Excell, Word, HTML for web pages, text list, ODBC, email, etc. Using export in HTML format you can send data directly to the Web server, thus giving the opportunity to users worldwide to see and use data from game.
- Competition support:
  - types of tournaments: World/European championships, Olympics
  - league or cup types of competition.

## BasketStats's user interface
