Email: info@sportcode.co.yu Mob: +381(0)63/720 45 17

Analyze and easy get fast result for any sport.

**The SportMetrics** database enables you to analyze and compare any user's parameters; unlimited numbers of users (players, teams) and for them you can track unlimited number of parameters (any numerical value) based on event's name (game, gym exercise, date..) and then get chart (bar, pie, line...) and print it. Additionally, SportMetrics keep list of document (video clip, picture, word, excel....) for each user. You can run document by double click on it in the list.

### Features

- Create unlimited number of parameters.
- Unlimited number of events.
- Unlimited number of users: players or teams.
- Enter value for user's parameter based on event's name and/or time.
- Analyze parameter or parameters of one or more users.
- Watch & print one of chart diagrams (bar, pie, line...) for easy tracking.
- Keep list of important files per each user; file can be anything: video clip, picture....

### Screen Shoots

The screenshots illustrate the software's workflow. The 'SportMetrics Wizard' window shows a 'Parameter list' with items like 'Bench Press - kg', 'Shoot2Pts%', and 'Sprint 100m'. The main 'SportMetrics' window displays a list of users and their associated files. The 'Report' window shows a bar chart comparing 'Shoot2Pts%' for three players across four games. The 'User's Parameters' window shows a detailed table of data for three players across nine games.

User	Event Name	ShootPts%	Shoot2Pts%	Sprint 100m	Bench Press - kg	some paran
Player1	game1	45	20	0	0	30
	game2	70	11	0	0	11
	game3	66	33	0	0	33
	game4	98	60	0	0	75
	game5	75	40	0	0	0
	gym 1.8.2007	0	0	11	90	45
	game6	45	44	0	0	0
	game7	80	90	0	0	1
	game 8	55	75	0	0	1
game9	36	66	0	0	0
